Professional Summary

Senior QA Engineer with 7+ years of experience in test automation and quality engineering across web and mobile products, APIs, accessibility, visual regression, and distributed systems.

Specialized in risk-based test strategy, automation architecture, API and integration testing, CI/CD, and observability. Combines Java, Python, and TypeScript to evolve frameworks and pipelines, mentor QAs, and improve release confidence across the SDLC.

Core Competencies

Quality Strategy & Planning: Risk-based testing, test planning, coverage analysis, prioritization, and quality advocacy

Technical Leadership & Mentorship: Framework architecture, pipeline design, mentoring, code review, and knowledge sharing

Test Automation Architecture: Maintainable automation across web, mobile, API, E2E, integration, and regression layers

API & Integration Quality: REST API validation, integration flows, microservices, test data, and root-cause analysis

Continuous Testing & CI/CD: Automated quality gates, release workflows, pipeline optimization, and feedback-cycle improvement

Web, Mobile & Accessibility Quality: Cross-platform validation, iOS, Android, WCAG, and assistive technologies

Observability & Incident Investigation: Logs, metrics, monitoring, operational evidence, and root-cause investigation

Professional Experience

Senior QA Engineer | Trustly

Jan 2026 - Sep 2026 | São Paulo, São Paulo, Brazil | Remote

- Defined and drove risk-based test strategies for critical payment journeys within a frontend squad of 14 developers and 4 QAs, including test-cycle planning in Zephyr Scale for weekly releases.
- Built and maintained 20+ E2E scenarios with Java, Selenide, and Cucumber, covering sanity and regression flows; reduced manual execution and increased confidence in weekly releases.
- Designed and evolved a 12-scenario visual regression sanity suite using TypeScript, Playwright, BackstopJS, and Cucumber, contributing to framework architecture, CI/CD pipelines, configurable parameters, and migration work.
- Validated desktop and mobile accessibility with NVDA, JAWS, VoiceOver, and TalkBack against WCAG guidance.
- Applied GitHub Copilot, Claude Code, and MCP-based workflows to accelerate recurring engineering and testing activities.

Senior QA Engineer | AB InBev

Sep 2024 - Jan 2026 | Campinas, São Paulo, Brazil | Hybrid

- Defined and drove the test strategy for BEES Customer web and mobile commerce journeys within a mobile team of 4 developers (2 iOS and 2 Android) and 1 QA, supporting biweekly releases across iOS and Android and using Xcode, Android Studio, and LambdaTest for cross-platform validation.
- Established local and integrated testing approaches using mocks, INT and UAT environments, Firebase Remote Config, feature flags, and Optimizely A/B tests.
- Developed and maintained E2E automation with Python, Pytest, Selenium, and Appium to cover critical web and mobile journeys.

- Served as the team’s technical reference for reproducing complex scenarios and isolating bug root causes with Charles Proxy and New Relic; validated APIs and integrations with Postman.
- Verified analytics implementations and event data with Segment, supporting reliable product insights.

Senior QA Engineer | CI&T

Dec 2022 - Aug 2024 | São Paulo, Brazil | Remote

- Helped define the Robot Framework architecture during the migration from Vividus, mentoring junior and mid-level QAs and reviewing Robot Framework code.
- Integrated Robot Framework with Applitools Eyes, Sauce Labs, and Jenkins, enabling more than 100 visual tests to run in parallel batches across three viewports.
- Optimized Robot Framework regression execution by parallelizing suites, removing unnecessary waits, and improving Jenkins pipelines with configurable parameters and better artifacts, while increasing coverage of critical user journeys.
- Designed test strategies and plans within a full-stack team of 8 developers and 2 QAs across three global client programs in the beverage, medical device, and food industries, aligning coverage with biweekly releases and cross-functional delivery.
- Monitored application behavior with New Relic and investigated incidents using ELK Stack logs, metrics, and operational evidence.
- Received CI&T’s “Mission Accomplished” recognition for consistent delivery, proactive knowledge sharing, test framework improvements, and support for other QAs.

Mid-Level QA Engineer | CI&T

Jan 2022 - Dec 2022 | São Paulo, Brazil | Remote

- Planned and executed functional and non-functional testing within a backend team of 8 developers and 2 QAs, focusing on risk mitigation.
- Automated E2E scenarios with Pytest and Selenium.
- Validated APIs and microservices with Postman and REST Assured.
- Integrated test execution into Azure DevOps pipelines and monitored application behavior with New Relic.
- Received CI&T’s “Client Satisfaction” recognition for rapid adaptation, professional communication, problem solving, and becoming a trusted member of the client team.

Software QA Engineer | e.Mix

Jul 2021 - Jan 2022 | São Paulo, Brazil | Remote

- Planned and executed functional, non-functional, API, and web testing; automated API and E2E scenarios with Postman, Newman, and Robot Framework.
- Executed performance, load, and stress tests with JMeter and integrated automated execution into Azure DevOps pipelines.

Software Engineer | DNGX

Mar 2019 - Jul 2021 | Santo André, São Paulo, Brazil | Hybrid

- Developed web and mobile applications with GeneXus and customized interfaces with WorkWithPlus and Smart Devices Plus.
- Designed solutions using SQL Server, PostgreSQL, and MySQL, while maintaining Jenkins delivery pipelines and functional test automation with GXTest.

Education

Postgraduate Specialization in Cybersecurity (Lato Sensu) | Universidade Cruzeiro do Sul

Mar 2021 - Mar 2022

Technologist Degree in Systems Analysis and Development | Universidade Cruzeiro do Sul

Feb 2018 - Aug 2020

Languages

Portuguese: Native

English: C2 Proficient (EF SET English Certificate 73/100)

Technical Skills

Quality Practices: Risk-Based Testing, Test Strategy, Test Planning, Test Case Design, Test Execution, Defect Management, Test Management

Test Automation: Playwright, Selenium, Selenide, Cypress, Appium, Pytest, Robot Framework, Cucumber, JUnit, TestNG, BackstopJS, Vividus

API & Integration: REST Assured, Postman, Bruno, Charles Proxy

CI/CD & Observability: Git, GitHub Actions, Jenkins, Azure DevOps, New Relic, ELK Stack

Programming Languages: Java, Python, TypeScript, JavaScript, SQL

Testing: Manual Testing, Functional Testing, Web Testing, Mobile Testing, API Testing, E2E Testing, Integration Testing, Regression Testing, Exploratory Testing, Acceptance Testing (UAT), Accessibility Testing (WCAG), Visual Regression Testing, Performance Testing

Test Management: Jira, Zephyr Scale, Xray

Mobile & Product Diagnostics: Xcode, Android Studio, Firebase Remote Config, Segment, Optimizely

Accessibility & Visual Testing: NVDA, JAWS, VoiceOver, TalkBack, WCAG, Applitools, Sauce Labs, LambdaTest

Performance Testing: JMeter, k6

AI-Assisted Engineering: GitHub Copilot, Claude Code, Cursor, MCP workflows
