Professional Summary

Senior Quality Engineer with 7+ years of experience in software engineering and quality for global digital products across fintech, healthcare, and commerce. Hands-on experience defining test strategies and building automation for web, mobile, APIs, accessibility, visual regression, and distributed integrations.

Works across the software development lifecycle with Java, Python, TypeScript, CI/CD, observability, and AI-assisted engineering practices to identify risks early and improve delivery confidence.

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

Test Automation: Playwright, Selenium, Selenide, Cypress, Appium, Pytest, Robot Framework, REST Assured, Cucumber, JUnit, TestNG, BackstopJS, Vividus

Testing: Web, Mobile, API, E2E, Integration, Exploratory, Accessibility, Visual Regression, Performance

Delivery and Observability: GitHub Actions, Jenkins, Azure DevOps, New Relic, ELK Stack

Tools: Git, Postman, Bruno, JMeter, AppliTools, Sauce Labs, LambdaTest, Charles Proxy, Jira, Zephyr Scale, Xray

AI-Assisted Engineering: GitHub Copilot, Claude Code, Cursor, MCP workflows

Languages: Portuguese (native), English (professional working proficiency)

Professional Experience

Senior QA Engineer | Trustly

Jan 2026 - Sep 2026 | Brazil

- Defined and executed risk-based test strategies for critical payment journeys across integration and acceptance environments.
- Developed and maintained E2E automation with Java, Selenide, and Cucumber for critical frontend flows.
- Built visual regression coverage with TypeScript, Playwright, BackstopJS, and Cucumber.
- Validated desktop and mobile accessibility with VoiceOver, TalkBack, NVDA, and JAWS against WCAG guidance.
- Applied GitHub Copilot, Claude Code, and MCP-based workflows to accelerate recurring engineering and testing activities.

Senior QA Engineer | AB InBev

Sep 2024 - Jan 2026 | Campinas, Brazil

- Planned and executed quality strategies for BEES Customer web and mobile commerce journeys on iOS and Android.
- Developed E2E automation with Python, Pytest, Selenium, and Appium.
- Investigated integrations and validated APIs using Charles Proxy and Postman.
- Verified analytics implementations and event data with Segment, supporting reliable product insights.
- Used Xcode, Android Studio, LambdaTest, Firebase Remote Config, New Relic, Jira, and Zephyr Scale during cross-platform delivery.

Senior QA Engineer / Mid-Level QA Engineer | CI&T

Jan 2022 - Aug 2024 | Campinas, Brazil

- Progressed from Mid-Level to Senior QA Engineer while supporting large-scale global products across multiple business domains.
- Designed test strategies and automated E2E, API, and integration scenarios with Vividus, Robot Framework, Pytest, Selenium, Postman, and REST Assured.
- Implemented visual regression with AppliTools Eyes and cross-browser coverage with Sauce Labs.

- Validated data with SQL Server and investigated incidents through ELK Stack logs, metrics, and operational evidence.
- Integrated continuous testing through Jenkins and Azure DevOps pipelines and monitored application behavior with New Relic.

Software QA Engineer | e.Mix

Jul 2021 - Jan 2022 | Campinas, Brazil

- Planned and executed functional and non-functional testing for web applications and REST APIs.
- Automated API and E2E scenarios with Postman, Newman, and Robot Framework.
- Executed performance, load, and stress tests with JMeter and integrated test execution into Azure DevOps pipelines.

Software Engineer | DNGX

Mar 2019 - Jul 2021 | Santo Andre, Brazil

- Developed web and mobile applications with GeneXus and customized interfaces with WorkWithPlus and Smart Devices Plus.
- Designed and implemented solutions using SQL Server, PostgreSQL, and MySQL.
- Maintained Jenkins delivery pipelines and implemented functional test automation with GXTest.

Selected Project

Samska Sandbox | Personal engineering project

2026 - Present | github.com/Samska/samska-sandbox

- Public educational platform built around a fictional commerce and logistics domain to practice end-to-end software engineering.
- Building Java/Spring Boot and React/TypeScript foundations, a local PostgreSQL and Docker Compose runtime, testing, and CI.
- Using AI coding agents while retaining human ownership of requirements, architecture, engineering decisions, review, and validation.

Education

Technology Degree in Systems Analysis and Development | Universidade Cruzeiro do Sul

Feb 2018 - Aug 2020

Cybersecurity Coursework | Universidade Cruzeiro do Sul

Mar 2021 - Mar 2022
