Professional Summary

Software engineering professional with 7+ years of combined experience in software development and quality, including Senior QA Engineer roles supporting global digital products across fintech, healthcare, and commerce. Hands-on experience defining test strategies and building automation for web, mobile, APIs, accessibility, visual regression, and distributed integrations.

Works across the software development lifecycle with Java, Python, TypeScript, CI/CD, observability, and AI-assisted engineering practices to identify risks early and improve delivery confidence.

Core Competencies

Quality Engineering & Shift-Left: Risk-based strategy, test planning, early risk identification, and quality advocacy

Test Automation Architecture: Designing maintainable automation across web, mobile, API, E2E, integration, and regression layers

Quality Across the SDLC: Functional, non-functional, exploratory, acceptance, accessibility, visual, and performance testing

API & Distributed Systems Quality: API validation, integration flows, microservices, test data, and risk analysis

Accessibility & Inclusive Quality: WCAG-oriented validation across desktop and mobile experiences

Continuous Testing & Delivery: Embedding automated quality checks into CI/CD pipelines and release workflows

Cross-Platform Quality Engineering: Managing browser, device, iOS, Android, and compatibility risks

Observability & Incident Investigation: Using logs, metrics, monitoring, and operational evidence to analyze application behavior

AI-Assisted Engineering & Test Workflows: Applying AI tools and agent-based workflows to improve repeatable engineering and testing activities

Agile Collaboration & Quality Advocacy: Working across product, engineering, and delivery teams to improve quality decisions

Professional Experience

Senior QA Engineer | Trustly

Jan 2026 - Sep 2026 | São Paulo, São Paulo, Brazil | Remote

- Defined and executed risk-based test strategies for critical payment journeys across integration and acceptance environments.
- Developed and maintained E2E automation with Java, Selenide, and Cucumber for critical frontend flows.
- Built visual regression coverage with TypeScript, Playwright, BackstopJS, and Cucumber.
- Validated desktop and mobile accessibility with VoiceOver, TalkBack, NVDA, and JAWS against WCAG guidance.
- Applied GitHub Copilot, Claude Code, and MCP-based workflows to accelerate recurring engineering and testing activities.

Senior QA Engineer | AB InBev

Sep 2024 - Jan 2026 | Campinas, São Paulo, Brazil | Hybrid

- Planned and executed quality strategies for BEES Customer web and mobile commerce journeys on iOS and Android.
- Developed E2E automation with Python, Pytest, Selenium, and Appium.
- Investigated integrations and validated APIs using Charles Proxy and Postman.
- Verified analytics implementations and event data with Segment, supporting reliable product insights.

- Used Xcode, Android Studio, LambdaTest, Firebase Remote Config, New Relic, Jira, and Zephyr Scale during cross-platform delivery.

Senior QA Engineer | CI&T

Dec 2022 - Aug 2024 | São Paulo, Brazil | Remote

- Designed test strategies for large-scale global digital products across the beverage, medical device, and food industries.
- Automated E2E scenarios with Vividus and Robot Framework.
- Implemented visual regression with Appliflow Eyes and cross-browser and device coverage with Sauce Labs.
- Integrated continuous testing through Jenkins and Azure DevOps pipelines.
- Monitored application behavior with New Relic and investigated incidents using ELK Stack logs, metrics, and operational evidence.

Mid-Level QA Engineer | CI&T

Jan 2022 - Dec 2022 | São Paulo, Brazil | Remote

- Planned and executed functional and non-functional testing focused on risk mitigation.
- Automated E2E scenarios with Pytest and Selenium.
- Validated APIs and microservices with Postman and REST Assured.
- Integrated test execution into Azure DevOps pipelines and monitored application behavior with New Relic.

Software QA Engineer | e.Mix

Jul 2021 - Jan 2022 | São Paulo, Brazil | Remote

- Planned and executed functional and non-functional testing for web applications and REST APIs.
- Automated API and E2E scenarios with Postman, Newman, and Robot Framework.
- Executed performance, load, and stress tests with JMeter and integrated test execution into Azure DevOps pipelines.

Software Engineer | DNGX

Mar 2019 - Jul 2021 | Santo André, São Paulo, Brazil | Hybrid

- Developed web and mobile applications with GeneXus and customized interfaces with WorkWithPlus and Smart Devices Plus.
- Designed and implemented solutions using SQL Server, PostgreSQL, and MySQL.
- Maintained Jenkins delivery pipelines and implemented functional test automation with GXTTest.

Education

Postgraduate Specialization in Cybersecurity (Lato Sensu) | Universidade Cruzeiro do Sul

Mar 2021 - Mar 2022

Technologist Degree in Systems Analysis and Development | Universidade Cruzeiro do Sul

Feb 2018 - Aug 2020

Languages

Portuguese: Native

English: C2 Proficient (EF SET English Certificate 73/100)

Technical Skills

Programming Languages: Java, Python, TypeScript, JavaScript, SQL

Test Automation: Playwright, Selenium, Selenide, Cypress, Appium, Pytest, Robot Framework, REST Assured, Cucumber, JUnit, TestNG, BackstopJS, Vividus

Testing: Web Testing, Mobile Testing, API Testing, E2E Testing, Integration Testing, Exploratory Testing, Accessibility Testing (WCAG), Visual Regression Testing, Performance Testing

Delivery and Observability: GitHub Actions, Jenkins, Azure DevOps, New Relic, ELK Stack

Tools: Git, Postman, Bruno, JMeter, Applitools, Sauce Labs, LambdaTest, Charles Proxy, Jira, Zephyr Scale, Xray

AI-Assisted Engineering: GitHub Copilot, Claude Code, Cursor, MCP workflows
