Professional Summary

Senior QA Engineer with 7+ years of experience in test automation and quality engineering across web and mobile products, APIs, accessibility, visual regression, and distributed systems.

Specialized in risk-based test strategy, automation architecture, API and integration testing, CI/CD, and observability. Combines Java, Python, and TypeScript to evolve frameworks and pipelines, mentor QAs, and improve release confidence across the SDLC.

Professional Experience

Senior QA Engineer | Trustly

Jan 2026 - Sep 2026 | São Paulo, São Paulo, Brazil | Remote

- On the Consumer Experience team, worked on Trustly Pay's Pay by Bank frontend journeys: bank selection and account authorization for payments, with funds captured later and the authorization available for subsequent transactions.
- Defined and drove risk-based test strategies for critical payment journeys within a squad of 14 developers and 4 QAs, including test-cycle planning in Zephyr Scale for weekly releases.
- Automated and maintained 20+ E2E scenarios with Java, Selenide, and Cucumber, covering sanity and regression flows and reducing recurring manual execution for weekly releases.
- Designed and evolved a 12-scenario visual regression sanity suite using TypeScript, Playwright, BackstopJS, and Cucumber, contributing to framework architecture, CI/CD pipelines, configurable parameters, and migration work.
- Validated desktop and mobile accessibility with NVDA, JAWS, VoiceOver, and TalkBack against WCAG guidance.
- Applied GitHub Copilot, Claude Code, and MCP-based workflows to accelerate recurring engineering and testing activities.

Senior QA Engineer | AB InBev

Sep 2024 - Jan 2026 | Campinas, São Paulo, Brazil | Hybrid

- On the BEES Customer Purchase Management team, worked on the mobile experience that brings together order and invoice history, purchase status, and delivery tracking for retailers, alongside BEES payment and logistics solutions.
- Defined and drove the test strategy for order history and tracking flows within a mobile team of 4 developers (2 iOS and 2 Android) and 1 QA, supporting biweekly releases and using Xcode, Android Studio, and LambdaTest for cross-platform validation.
- Established local and integrated testing approaches using mocks, INT and UAT environments, Firebase Remote Config, feature flags, and Optimizely A/B tests.
- Developed and maintained E2E automation with Python, Pytest, Selenium, and Appium for critical mobile app journeys.
- Served as the team's technical reference for reproducing complex scenarios and isolating bug root causes with Charles Proxy and New Relic; validated APIs and integrations with Postman.
- Verified analytics implementations and event data with Segment, supporting reliable product insights.
- Used Cursor and MCP-integrated tools to support test analysis, automation, and defect investigation in QA workflows.

Senior QA Engineer | CI&T

Dec 2022 - Aug 2024 | São Paulo, São Paulo, Brazil | Remote

- In one of the projects during this role, worked on the quality of a medical device web platform providing product information and clinical resources to healthcare professionals across markets, with a need for functional and visual consistency between sites.
- Co-defined the Robot Framework architecture with the QA Lead during the migration from Vividus, mentoring junior and mid-level QAs and reviewing Robot Framework code.
- Integrated Robot Framework with Applitools Eyes, Sauce Labs, and Jenkins, enabling more than 100 visual tests to run in parallel batches across three viewports.

- Optimized Robot Framework regression execution by parallelizing suites, removing unnecessary waits, and improving Jenkins pipelines with configurable parameters and better artifacts, while increasing coverage of critical user journeys.
- Designed test strategies and plans within a full-stack team of 8 developers and 2 QAs, aligning coverage with biweekly releases and cross-functional delivery.
- Monitored application behavior with New Relic and investigated incidents using ELK Stack logs, metrics, and operational evidence.
- Used CI&T FLOW, CI&T's generative AI platform, to support QA analysis and testing throughout software development.
- Received CI&T's "Mission Accomplished" recognition for consistent delivery, proactive knowledge sharing, test framework improvements, and support for other QAs.

Mid-Level QA Engineer | CI&T

Jan 2022 - Dec 2022 | São Paulo, São Paulo, Brazil | Remote

- On the EDI (Electronic Data Interchange) team, worked with the automated exchange of purchase orders between retailers' systems and a B2B commerce platform, a flow that depends on consistent data as orders are received and processed.
- Planned and executed functional and non-functional testing within a backend team of 8 developers and 2 QAs, focusing on risk mitigation.
- Automated E2E scenarios with Pytest and Selenium.
- Validated APIs and microservices with Postman and REST Assured.
- Integrated test execution into Azure DevOps pipelines and monitored application behavior with New Relic.
- Received CI&T's "Client Satisfaction" recognition for rapid adaptation, professional communication, problem solving, and becoming a trusted member of the client team.

Software QA Engineer | e.Mix

Jul 2021 - Jan 2022 | São Paulo, São Paulo, Brazil | Remote

- Worked on FollowNet, a foreign trade web platform that centralizes import and export events, documents, and alerts for freight forwarders and customs brokers, helping them track operations and identify exceptions in one place.
- Planned and executed functional and non-functional testing for web applications and REST APIs.
- Automated API and E2E scenarios with Postman, Newman, and Robot Framework.
- Executed performance, load, and stress tests with JMeter and integrated test execution into Azure DevOps pipelines.

Software Engineer | DNGX

Mar 2019 - Jul 2021 | Santo André, São Paulo, Brazil | Hybrid

- Developed web and mobile applications with GeneXus and customized interfaces with WorkWithPlus and Smart Devices Plus.
- Designed and implemented solutions using SQL Server, PostgreSQL, and MySQL.
- Maintained Jenkins delivery pipelines and implemented functional test automation with GXTTest.

Education

Postgraduate Specialization in Cybersecurity (Lato Sensu) | Universidade Cruzeiro do Sul

Mar 2021 - Mar 2022

Technologist Degree in Systems Analysis and Development | Universidade Cruzeiro do Sul

Feb 2018 - Aug 2020

Languages

Portuguese: Native

English: C2 Proficient (EF SET English Certificate 73/100)

Skills and Competencies

QA Strategy & Leadership: Risk-based testing, test strategy, test planning, coverage analysis, prioritization, release risk assessment, release readiness, framework architecture, pipeline design, mentoring, code review, knowledge sharing

Test Automation Architecture: Maintainable automation for web, mobile, API, E2E, integration, and regression; Playwright, Selenium, Selenide, Cypress, Appium, Pytest, Robot Framework, Cucumber, JUnit, TestNG, BackstopJS, Vividus

API & Integration Quality: REST API validation, integration flows, microservices, test data management; REST Assured, Postman, Bruno, Charles Proxy

Continuous Testing, CI/CD & Observability: Automated quality gates, release workflows, pipeline optimization, feedback-cycle improvement, logs, metrics, monitoring, operational evidence; Git, GitHub Actions, Jenkins, Azure DevOps, New Relic, ELK Stack

Programming Languages: Java, Python, TypeScript, JavaScript, SQL

Testing Domains: Smoke Testing, Manual Testing, Functional Testing, Web Testing, Mobile Testing, Cross-browser Testing, API Testing, E2E Testing, Integration Testing, Regression Testing, Exploratory Testing, Acceptance Testing (UAT), Accessibility Testing (WCAG), Visual Regression Testing, Performance Testing

Test Management & Incident Analysis: Jira, Zephyr Scale, Xray, test case design, test execution, defect management, defect triage, root-cause analysis

Mobile & Product Diagnostics: Cross-platform validation, iOS, Android, Xcode, Android Studio, Firebase Remote Config, Segment, Optimizely

Accessibility & Visual Testing: WCAG compliance, assistive technologies, NVDA, JAWS, VoiceOver, TalkBack, AppliTools, Sauce Labs, LambdaTest

Performance Testing: JMeter, k6

AI-Assisted Engineering: GitHub Copilot, Claude Code, Cursor, MCP workflows
