Professional Summary

Senior QA Engineer with 7+ years of experience in test automation and quality engineering across web and mobile products, APIs, accessibility, visual regression, and distributed systems.

Specialized in risk-based test strategy, automation architecture, API and integration testing, CI/CD, and observability. Combines Java, Python, and TypeScript to evolve frameworks and pipelines, mentor QAs, and improve release confidence across the SDLC.

Professional Experience

Senior QA Engineer | Trustly

Jan 2026 - Sep 2026 | São Paulo, São Paulo, Brazil | Remote

- Focused on Trustly Pay's Pay by Bank frontend journeys within the Consumer Experience team: bank selection and account authorization for payments, with later fund capture and authorization reuse in subsequent transactions.
- Led risk-based test strategy for critical payment journeys in a squad of 14 developers and 4 QAs, planning test cycles in Zephyr Scale for weekly releases.
- Built and maintained 20+ E2E scenarios with Java, Selenide, and Cucumber, covering sanity and regression flows while reducing recurring manual execution before weekly releases.
- Evolved a 12-scenario visual regression sanity suite with TypeScript, Playwright, BackstopJS, and Cucumber; contributed to framework architecture, CI/CD pipelines, configurable parameters, and migration work.
- Assessed desktop and mobile accessibility with NVDA, JAWS, VoiceOver, and TalkBack against WCAG guidance.
- Applied GitHub Copilot, Claude Code, and MCP-based workflows to accelerate recurring engineering and testing activities.

Senior QA Engineer | AB InBev

Sep 2024 - Jan 2026 | Campinas, São Paulo, Brazil | Hybrid

- Supported quality for BEES Customer's Purchase Management mobile experience, bringing together order and invoice history, purchase status, and delivery tracking for retailers alongside BEES payment and logistics solutions.
- Defined the test strategy for order history and tracking in a mobile team of 4 developers (2 iOS and 2 Android) and 1 QA; supported biweekly releases with Xcode, Android Studio, and LambdaTest for cross-platform validation.
- Established local and integrated testing approaches using mocks, INT and UAT environments, Firebase Remote Config, feature flags, and Optimizely A/B tests.
- Implemented E2E automation with Python, Pytest, Selenium, and Appium for critical mobile app journeys.
- Traced complex defects to their root causes with Charles Proxy and New Relic as the team's technical reference; checked APIs and integrations with Postman.
- Verified analytics instrumentation and event data in Segment, supporting reliable product insights.
- Incorporated Cursor and MCP-integrated tools into test analysis, automation, and defect investigation.

Senior QA Engineer | CI&T

Dec 2022 - Aug 2024 | São Paulo, São Paulo, Brazil | Remote

- On one project during this role, supported quality for a medical device web platform providing product information and clinical resources to healthcare professionals across markets, where sites required functional and visual consistency.
- Partnered with the QA Lead to define Robot Framework architecture during the Vividus migration; mentored junior and mid-level QAs and reviewed framework code.
- Enabled 100+ visual tests to run in parallel batches across three viewports by integrating Robot Framework with AppliTools Eyes, Sauce Labs, and Jenkins.
- Streamlined Robot Framework regression execution by parallelizing suites, removing unnecessary waits, and improving Jenkins pipelines with configurable parameters and better artifacts; expanded coverage of critical user journeys.
- Aligned test strategies and plans with biweekly releases in a full-stack team of 8 developers and 2 QAs, coordinating coverage across functions.
- Investigated incidents using New Relic and ELK Stack logs, metrics, and operational evidence.

- Applied CI&T FLOW, CI&T's generative AI platform, to support QA analysis and testing throughout software development.
- Earned CI&T's "Mission Accomplished" recognition for consistent delivery, proactive knowledge sharing, framework improvements, and support for other QAs.

Mid-Level QA Engineer | CI&T

Jan 2022 - Dec 2022 | São Paulo, São Paulo, Brazil | Remote

- On the EDI (Electronic Data Interchange) team, supported the automated exchange of purchase orders between retailers' systems and a B2B commerce platform, where data consistency matters as orders are received and processed.
- Prioritized functional and non-functional tests for an 8-developer, 2-QA backend team, focusing on risk mitigation.
- Created E2E scenarios with Pytest and Selenium.
- Tested APIs and microservices with Postman and REST Assured.
- Added test execution to Azure DevOps pipelines and used New Relic to monitor application behavior.
- Earned CI&T's "Client Satisfaction" recognition for rapid adaptation, professional communication, problem solving, and becoming a trusted member of the client team.

Software QA Engineer | e.Mix

Jul 2021 - Jan 2022 | São Paulo, São Paulo, Brazil | Remote

- Tested FollowNet, a foreign trade web platform centralizing import and export events, documents, and alerts for freight forwarders and customs brokers, through functional and non-functional checks of web workflows and REST APIs.
- Automated API and E2E scenarios with Postman, Newman, and Robot Framework.
- Ran performance, load, and stress tests with JMeter through Azure DevOps pipelines.

Software Engineer | DNGX

Mar 2019 - Jul 2021 | Santo André, São Paulo, Brazil | Hybrid

- Developed web and mobile applications with GeneXus and customized interfaces using WorkWithPlus and Smart Devices Plus.
- Designed and implemented solutions with SQL Server, PostgreSQL, and MySQL.
- Maintained Jenkins delivery pipelines and implemented functional test automation with GXTTest.

Education

Postgraduate Specialization in Cybersecurity (Lato Sensu) | Universidade Cruzeiro do Sul

Mar 2021 - Mar 2022

Technologist Degree in Systems Analysis and Development | Universidade Cruzeiro do Sul

Feb 2018 - Aug 2020

Languages

Portuguese: Native

English: C2 Proficient (EF SET English Certificate 73/100)

Skills and Competencies

QA Strategy & Leadership: Risk-based testing, test strategy, test planning, coverage analysis, prioritization, release risk assessment, release readiness, framework architecture, pipeline design, mentoring, code review, knowledge sharing

Test Automation Architecture: Maintainable automation for web, mobile, API, E2E, integration, and regression; Playwright, Selenium, Selenide, Cypress, Appium, Pytest, Robot Framework, Cucumber, JUnit, TestNG, BackstopJS, Vividus

API & Integration Quality: REST API validation, integration flows, microservices, test data management; REST Assured, Postman, Bruno, Charles Proxy

Continuous Testing, CI/CD & Observability: Automated quality gates, release workflows, pipeline optimization, feedback-cycle improvement, logs, metrics, monitoring, operational evidence; Git, GitHub Actions, Jenkins, Azure DevOps, New Relic, ELK Stack

Programming Languages: Java, Python, TypeScript, JavaScript, SQL

Testing Domains: Smoke Testing, Manual Testing, Functional Testing, Web Testing, Mobile Testing, Cross-browser Testing, API Testing, E2E Testing, Integration Testing, Regression Testing, Exploratory Testing, Acceptance Testing (UAT), Accessibility Testing (WCAG), Visual Regression Testing, Performance Testing

Test Management & Incident Analysis: Jira, Zephyr Scale, Xray, test case design, test execution, defect management, defect triage, root-cause analysis

Mobile & Product Diagnostics: Cross-platform validation, iOS, Android, Xcode, Android Studio, Firebase Remote Config, Segment, Optimizely

Accessibility & Visual Testing: WCAG compliance, assistive technologies, NVDA, JAWS, VoiceOver, TalkBack, AppliTools, Sauce Labs, LambdaTest

Performance Testing: JMeter, k6

AI-Assisted Engineering: GitHub Copilot, Claude Code, Cursor, MCP workflows
